

EMCORViaTM
COLLABORATIVE WORK MANAGEMENT

A comprehensive view on collecting, managing, analyzing and reporting facility data

BENEFITS

Centralized and standardized work order data ensures efficiently scheduled and completed tasks

Improved scheduling drives productivity of workforce and suppliers, saving time and money

Integrated financial tracking and maintenance activity captures 100% of maintenance cost

Accurate budgeting and forecasting capabilities provides visibility into total maintenance spend

Convenient online dashboard allows customers to make informed business decisions based on captured data

Continuous improvement through ongoing reporting

Customized reporting capabilities specific to client business needs

Web-based access allows real-time access and ease of use from anywhere

Mobile interface for immediate work order entry and response

Benchmark data across portfolios and like industries

Ability to use repair data for capital justification

The power of visibility.

The ability to view all aspects of your work order management from one streamlined portal any time of the day—EMCORViaTM is your comprehensive window to the entire process, helping you make more informed decisions at a moment's notice. The more you can view, the more you can initiate and respond to.

The power of access.

In addition to viewing all work order/invoice/schedule/contract activity,

easy access to that information is a must—and EMCORVia puts it all at your fingertips. The centralized model acts as a hub for both Web-based and mobile access, entry and response. With everything under one roof, work order management has never been so easy.

The power of sharing.

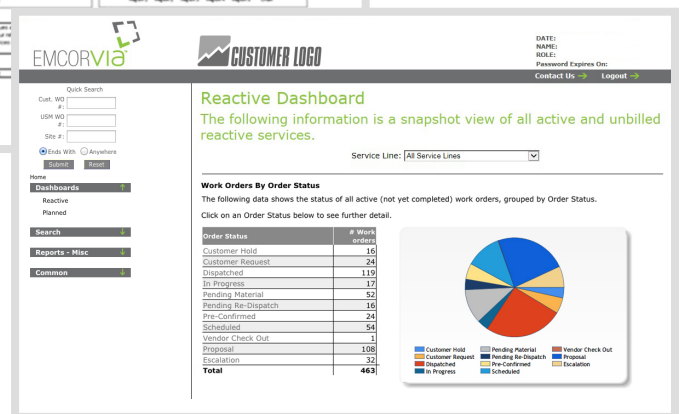

The collaborative nature of EMCORVia makes it easy to share data—and benefit from that real-time sharing.

With all financials, work management and reporting functions linked together, everyone on your team

stays up-to-the-minute on all spending and maintenance activity, so there are no surprises.

EMCORVia users have the ability to produce various customized dashboards.

EMCORVia™ GIVES YOU A COMPREHENSIVE VIEW

- > Contact Information
- > Reporting
- > Work Orders
- > Schedules
- > Invoices
- > Contracts
- > Equipment Inventory

- > Equipment cost tracking
- > Maintenance procedures
- > Service line cost
- > Work order data
- > Safety procedures
- > Alarm Management
- > Training

FIELD PRODUCTIVITY ENHANCEMENTS

Flexibility to choose from multiple devices depending on application

Ability to participate in training programs or other online content such as OSHA training

Communication with management and support teams

Access to process changes and SOPs

Access to data through Excel and Word

Easier to use/view with keyboard and larger screen options

Routing software allows us to reset routes for hundreds of technicians and thousands of locations when adds or deletes are made. We use the software to develop solutions by quickly aligning staffing, skills and locations with new portfolios.
